THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1X

1. The Unsan Airfield north of Sinanju (125-36, 39-36) has been constructed for the primary purpose of inviting attacks by UN planes so that they may become targets for the anti-aircraft guns there; consequently, this airfield is poorly constructed.
2. This airfield is north of Sinanju, about 10 kilometers north of Unsan, on a plain just south of a high mountain. The field is about 500 meters wide and 2,000 meters long. The runway extends from east to west and is 1,500 meters long and 50 meters wide; it is surfaced with sand, stones and a little cement. Two stone buildings have been constructed on the north side of the runway; they are used as quarters for Communist air-defense personnel stationed at the field. The highway to Unsan is about 3 kilometers west of the airfield, and a military road has been built to connect the highway and the airfield.
3. Five anti-aircraft gun positions containing a total of twelve guns have been established near this airfield; three of them are on the top of the mountain directly north of the field and the other two are on lower parts of the mountain toward the eastern and western ends of the field. Fortifications built of stone blocks and camouflaged with trees have been placed around the gun positions. The air defense headquarters has been established in a cave about halfway up the south side of the mountain overlooking the field. A communications office has been established in an adjoining cave. Both these caves are well camouflaged and difficult to observe.
